

I. STANDARTINIAI LAN KOMUTATORIŲ IR MARŠRUTIZATORIŲ PAKEITIMAI

1. VLAN changes add/delete
2. Trunking configuration add/delete
3. DHCP server add/delete
4. DHCP IP helper add/delete
5. Port forward add/change/delete
6. Spanning tree configuration add/delete
7. Storm control configuration add/delete
8. Etherchannel add/delete
9. Multicast configuration add/delete
10. Port parameters change (etc. monitoring, duplex)
11. LAN switch OS change
12. Device password add/change/delete
13. SNMP community strings add/change/delete
14. Device interface modify
15. IP address/subnet mask add/change/delete
16. Routing add/change/delete
17. Host name change
18. ACL entry add/modify/delete
19. IPSec configuration add/modify/delete

II. STANDARTINIAI WIFI RYŠIO STOTELIŲ IR KONTROLERIŲ PAKEITIMAI

1. Radio band (2,4GHz and 5GHz) enable/disable
2. Radio channel change
3. Power change
4. SSID add/modify/delete
5. VLAN changes add/delete
6. Wireless security (802.11/802.11i) add/modify/delete
7. Rate limiting add/modify/delete
8. MAC ID filtering add/modify/delete
9. Routing add/modify/delete
10. AP and Controller OS change

III. STANDARTINIAI UGNIASIENIŲ PAKEITIMAI

1. Device interface modify
2. Device password add/change/delete
3. Host name change
4. IP address/subnet mask add/change/delete
5. DHCP server add/delete
6. VLAN changes add/delete
7. Routing add/change/delete
8. Port parameters change (etc. monitoring, duplex)
9. ACL, Policy entry add/modify/delete
10. UTM profiles add/modify/change
11. IPSec configuration add/modify/delete
12. SSL VPN configuration add/modify/delete
13. VPN client configuration add/modify/delete
14. Syslog configuration add/delete
15. Firewall OS change
